

APA 2019 - ENVIRONMENTAL EVALUATIONS OF BLOCKS

Acona's environmental evaluations of blocks in OED's licensing rounds give an instant overview of environmental issues and conditions. The evaluations, which can be utilized directly in license applications, focus on identification of environmental and fishery conditions that may cause operational challenges for future petroleum activity.

SERVICE CONTENTS

- ✓ Overview of environmental conditions
- ✓ Assessment of resource vulnerability
- ✓ Recommendations for activity periods
- ✓ Overview of fishery activity
- ✓ Maps of natural resources
- ✓ One page summary table
- ✓ Environmental texts for application

CLIENT BENEFITS

- ✓ Head start in project risk evaluation
- ✓ Compliance with the Petroleum regulations and Management plans
- ✓ Prevention of conflicts with third parties
- ✓ Potential reduction of costs
- ✓ High quality license applications
- ✓ Positive recognition from the authorities

Our Environmental Advisors have many years of experience in identifying environmental challenges for blocks in OED's licensing rounds. We have extensive knowledge of the natural resources along the Norwegian coast and in-depth understanding of the Petroleum HSE regulations on the Norwegian sector

Prices

Pricing is founded on a base cost plus a fixed sum per block. Adjacent blocks are considered as one block in the price model. Acona will give advice for reasonable block packages for clients who are interested in several blocks within the same area. For the full report the base cost is for each sea area (North Sea, Norwegian Sea, Barents Sea).

Modules	Executive report	Full report
Base cost (NOK)	Contact us for price	Contact us for price
Price per block (NOK)	Contact us for price	Contact us for price

Clients can choose between two reports:

Executive environmental report

Include vulnerability assessment and conditions for environment and fishery presented in a one page summary table. A map of relevant natural resources is included. The product gives an instant overview of environmental issues for the block(s)

Full environmental report

Include description of biology and vulnerability of resources with maps, in addition to vulnerability assessment and conditions for environment and fishery in a one page summary table. The product gives a more detailed overview of environmental issues for the block(s)

After a successful award

Acona offer discounted Environmental Screening reports to meet the need of more detailed information in the planning phase of exploration activity after licenses have been awarded.

Confidentiality

All information on orders is treated as strictly confidential by Acona. We will sign forms of confidentiality upon request.

Environmental consultancy

Our environmental specialist may participate in company workshops related to the licensing round and we assist clients in writing the environmental section in the license applications.
