

## Regulatory Compliance

Acona has expertise in the Norwegian regulatory regime for the Petroleum Activities. The services include prequalification and management systems for license and operator status, HSE supervisory activities, writing applications, regulatory compliance plans for field development projects and installation system requirements and regulatory training.

### PETROLEUM LEGISLATION

- Which Acts and Regulations apply when, where and for whom?
- How do you interpret and use regulations, guidelines and industry standards?
- What is the role of the “responsible party”
- What are the requirements for employee contribution and how do you organize this?

Finding, applying and interpreting the regulatory requirements

### CONTRACTORS AND SUPPLIERS

- What requirements apply to contractors and suppliers in the petroleum activities?
- How do you ensure adherence with requirements in international HSE and Quality Standards?
- How do you document compliance with authority requirements?

### REGULATIONS

- Petroleum Act
- Working Environment Act
- Pollution control Act
- Health Acts
- HSE-regulations
- Guidelines and recognized norms
